

Ultimate Poster Making Kit!

Contains: carrying tray, three felt-tipped applicators that allow three different strokes per colour, and 8 quarts of ink (red, blue, black, green, pink, purple, yellow, orange)

The water-based ink is odorless, will not bleed through paper, is totally non-flammable, and cleans up with a damp cloth on most non-porous surfaces. Banners dry quickly and can be laminated to make them waterproof.

This self-contained kit will solve all your temperamental Temptra problems. Simply add water and more ink when the applicators dry out. The carrying tray keeps track of errant pots of ink. Your custodians will love you for not messing up their sinks with temptra brushes and paints!

(The ink supply lasted for two school years under heavy use, including two full elections, before more ink was needed. *Dave Conlon EDSS*)

Ink can be purchased separately.
